

Injury LawStars — Florida personal injury SEO

From my previous digital marketing company. I worked multiple US law sites. This is one I can share: injurylawstars.com

PRACTICE	GEO	WINDOW	HEADLINE KPI
Personal injury Car, truck, bicycle, slip/fall, medical malpractice, workers' comp, construction, brain injury	Florida Clermont, Ocala, Kissimmee + statewide FL	Jan–Aug 2026 Joined ~Jan 23 · GSC 6-mo through Aug 17	+90.6% clicks 1,769 vs 928 prior 6 months

What I actually did (techniques)

1. **Local SEO + GBP.** City landing pages (/clermont/, /ocala/, /kissimmee/) tied to Google Business Profile with utm_source=GMBmain. Tracked search impressions, map impressions, website clicks, and phone calls from GBP.
2. **Practice-area money pages.** Florida personal injury templates for truck, bicycle, construction, settlements — built to convert (forms + calls), not just rank.
3. **Creating blog pages.** Built the blog, then created and published Florida personal injury pages: what to do after a car accident, average car accident settlement, pain and suffering, statute of limitations, slip and fall, no-fault/PIP, dog bite, brain injury settlements, filing a claim without a lawyer. Each page got a CTA, on-page SEO, and internal links to service + city pages.
4. **Indexation / crawl health.** Grew indexed URLs ~75 → 227. Cut unindexed after the mid-year spike. Technical queue stayed on errors while organic grew.
5. **On-page + speed.** Lighthouse SEO 100, Best Practices 100, Performance 94. Title/meta/internal linking aligned to commercial personal injury + city intent.
6. **Intake as the real KPI.** Organic and GBP traffic attributed to PhoneCall + Lead on contact, attorney bios, and practice pages. Vanity traffic was not the goal.

Work completed (queue)

All of the below were marked Completed on the Injury LawStars board. This is the actual task mix I ran — setup, technical, local, then creating and publishing blog pages.

Creating blog pages

- **Build a blog** (new blog section / templates)
- **Create blog pages** — titles, slugs, on-page SEO, CTAs, internal links to personal injury + city pages
- Adding CTA for upcoming blog posts
- Keyword research for Florida personal injury topics
- Write + publish:
 - What to Do After a Car Accident in Florida
 - Average Car Accident Settlement in Florida
 - Pain and Suffering Settlement Worth in Florida
 - Florida Statute of Limitations for Personal Injury Claims
 - What to Do After a Slip and Fall Accident in Florida
 - Florida No-Fault Insurance and PIP Explained
 - Florida Dog Bite Laws and Your Rights After an Attack
 - Brain Injury Settlements in Florida
 - How to File a Personal Injury Claim Without a Lawyer in Florida

Technical SEO & site setup

- Technical site audit and Core Web Vitals audit
- Enforce HTTPS and canonical domain configuration
- Review sitemap for errors
- Review and optimize XML sitemap for legal practice
- Ensure sitemap is uploaded to Google Search Console
- Connect GSC, CMS, sitemap, and GBP
- Add tracking snippet to head tag
- Update image style
- Complete onboarding checklist + 14-day check-in
- Configure conversion events to capture leads

Local SEO

- Optimize Google Business Profile for Florida legal practice
- Connect Google Business Profile
- Directory submission audit — Injury LawStars

KPIs I reported

Metric	Result
GSC clicks (6 mo)	1,769 · +90.6% vs prior (928)
GSC impressions (6 mo)	652K · +39.3% vs prior (467.9K)
Avg position	28.0 → 18.8 (–32.9%, better)
CTR	0.2% → 0.3% (+36.8%)
Clicks since signup	574 · +262.5% · 1-month +75.4%
Impressions (1 mo)	~145.8K · +15.2%
Top 10 keywords	~2.6K · +49.5% (1 mo) · +181.2% since signup Filtered GSC: Top 3 = 27, Top 5 = 46, Top 10 = 100 (Aug 14)
Indexed pages	227 · +62.1% vs ~30 days prior
Unindexed	74 · –19.4% (1 mo) · –37.5% (7d)
Domain authority	22 · +4.8%
Clermont city page	37 → 188 clicks · 9.3K → 62.1K impressions (GMB organic)
Homepage	167–187 → 215 clicks · 58.1K → 117.9K impressions
Semrush (spot check)	Organic ~1.3K/mo (+13%), 1.6K keywords (+28%), AS 25, 301 referring domains, AI visibility 14 (US 100%)
Speed	Performance 94 · SEO 100 · Best Practices 100 · TTI 1562ms · Speed Index 944ms

Dashboards

Screenshots from the client reporting stack (GSC, GBP, indexation, speed, conversions).

1. Account overview — clicks, Top 10, indexation

Technique: weekly KPI board so technical debt (errors / unindexed) does not hide growth.

2. Organic + AI search (US-only)

Technique: track classic organic and AI citations together. Traffic inflection in 2026 after content + indexation work.

3. Google Search Console — 6 months vs prior

Technique: always compare the same window YoY/period. Clicks +90.6%, position 28 → 18.8.

4. Page-level winners — city page + personal injury blogs

Technique: GMB → /c1ermont/ (188 clicks). Informational blogs capture “what’s my case worth” intent, then internal-link to consult.

Search Console Tables		
Formula rows are grouped by the selected table dimension: query, page, or search appearance. Clicks and impressions are summed by group. CTR = clicks / impressions; average position is the GSC Search Analytics average position for that group. Source: live Google Search Console Search Analytics API.

5. Rolling 30-day trends

Technique: 30-day click window ~210 → ~585. Top 10 keywords roughly tripled on the filtered view.

6. Keyword tiers (filtered, 50+ impressions)

Technique: report Top 3 / 5 / 10 / 25 / 50, not just “total keywords.” Filtered to queries that actually get impressions and clicks.

7. Index more, then clean unindexed

Technique: publish city + practice + blog URLs, inspect in GSC, fix NOT PASS. Indexed ~75 → ~230. Unindexed spike in July was pulled back down.

8. Google Business Profile (all locations)

Technique: Map Pack is the personal injury intake channel. Search + map impressions up; GBP phone calls from ~0 to a peak of 12 in the window.

9. Conversions — calls and form leads

Technique: attribute PhoneCall / Lead to organic + GBP. Landing pages: Clermont, Ocala, Kissimmee, truck/bicycle personal injury, attorney bios, contact.

10. Core Web Vitals / Lighthouse

Technique: keep SEO and Best Practices at 100 while organic scales. Speed is table stakes for competitive personal injury SERPs.
